

## New Color Coded Mop Bucket System

Pre-Treat Mop System is a new cleaning and sanitization system which drastically changes manual floor cleaning with the use of pre-treated microfiber mops.  
 With this cleaning system the mops should be prepared at least 4 hours ahead of time, allowing them to be impregnated with a solution of water and detergent.

1. Place 20 microfiber mops to treat in the blue 22 L. bucket, ensuring the bucket is perfectly clean and odorless.

6. Remove the lid from the blue bucket and remove a microfiber mop. Place the mop onto the mop base and begin cleaning the floor from the furthest point and work in an "S" shaped movement towards the door.

2. Pour the water and detergent solution over the mops in the correct quantity. For 20 mops, 1-5 L. of solution is usually enough.

3. Close the 22 L. bucket with lid.

Product # EP-Blue Bucket System  
 Mfr: Italy  
 Length: 20 1/2"  
 Width: 10 1/2" Height: 10 1/2"

Product # EP-Red Bucket System  
 Mfr: Italy  
 Length: 20 1/2"  
 Width: 10 1/2" Height: 10 1/2"

7. Once you have finished cleaning, remove the dirty mop from the frame without touching it, using your foot to aid removal. Place the used mop in the red bucket (designated for dirty mops).

4. Turn the 22 L. bucket containing the clean mops and the detergent solution upside down and leave for at least 4 hours. This way all the mops are evenly impregnated by osmosis.

5. Place the blue bucket with clean pre-treated mops and the red bucket for (contaminated mops) onto the cart and wheel to the work area.

Product # EP-Cleaning Cart  
 Comes with Both Buckets (Blue & Red)  
 Mfr: Italy  
 Height: 37 1/2"  
 Width: 20 1/2" Depth: 17"

### THE ADVANTAGES:

**Reduces working times** as the mops are ready to be used and the operator does not have to fill buckets, wring mops or dilute products during cleaning.

**Speeds up any type of manual cleaning** of floors etc.

**Easy to use:** the operator has mops ready to be used and once he arrives on site with the service trolley he can start cleaning straight away using a mop for each room.

**Mops can be reused until worn:** the pre-treated mops can be used even 7-10 days after preparation, as long as the bucket is sealed at the end of work; this means that they can be easily transported in the bucket from one site to another for several days.
